

SHUBHI CHANDRA

+91-9458826934 | shubhichandra257@gmail.com | LinkedIn | GitHub

SKILLS

Languages: C++, Java, JavaScript, SQL

Backend & Frameworks: Spring Boot, Spring Security, Hibernate, REST APIs, Microservices, Maven

Frontend: HTML, CSS, React.js

Database/Platform: MySQL

Testing: JUnit, Mockito, Debugging, SOLID Principles

Cloud & DevOps: AWS (EC2, S3, RDS), Docker, CI/CD, Git, GitHub, GitLab, Linux

EDUCATION

Madan Mohan Malaviya University Of Technology, Gorakhpur | Gorakhpur, UP, India

Bachelor of Technology – Information Technology; CGPA: 7.56 | Dec 2021 – May 2025

EXPERIENCE

Project Engineer — Crio.Do, Bengaluru, India | Jun 2025 – Present

- Owned end-to-end development of Spring Boot microservices for Sprint Board workflows (progress tracking, session links, recordings), driving learner engagement features from design through deployment.
- Built Mentor Portal and User Details backend services enabling secure learner data retrieval and controlled VM access, reducing support resolution time by ~25–30%.
- Diagnosed and resolved backend API, authentication, and deployment issues across Dockerized, AWS-hosted environments, improving platform reliability and reducing escalations.
- Applied TDD with JUnit and Mockito to raise code maintainability and cut regressions introduced during feature rollouts.
- Led technical mentoring and debugging sessions on Java, Spring Boot, and backend system design, accelerating project completion.

Amazon ML Summer School — Virtual Internship, Amazon (Remote) | Jul 2024 – Aug 2024

- Trained on supervised and unsupervised ML algorithms using scikit-learn, NumPy, and Pandas, building models from scratch and validating them on real-world datasets through lab simulations.

PROJECTS

Parking Management System | Java, Spring Boot, JPA/Hibernate, MySQL, Postman, JUnit, Mockito

- Developed a RESTful backend managing 3 core modules: Vehicles, Parking Slots, and Parking Records.
- Implemented 15+ REST APIs for vehicle registration, slot allocation, parking entry/exit, and record management.
- Designed a 4-layer architecture (Controller, Service, Repository, Entity) for modular, maintainable code.
- Created and validated 16+ test cases covering API functionality, CRUD operations, and database interactions.

Buy-Buddy Backend Microservices | Java, Spring Boot, MySQL, Docker, AWS

- Built a microservices-based e-commerce backend with Customer, Product, and Order services using Spring Boot and Spring Cloud.
- Implemented service discovery and inter-service communication using Eureka Server, Spring Cloud Gateway, and OpenFeign.
- Containerized backend services with Docker and configured Kubernetes deployment for scalable application environments.

ShopNest – Secure eCommerce Backend | Java, Spring Boot, Spring Security, JWT, JPA, MySQL

- Built a role-based e-commerce backend supporting Admin, Seller, and Customer workflows using Spring Boot, JPA/Hibernate, and MySQL.
- Implemented JWT-based authentication and authorization with Spring Security, BCrypt password encryption, account activation, and password recovery.
- Built RESTful APIs for product/category management, search, filtering, pagination, and sorting, following a layered Controller-Service-Repository architecture.

ACHIEVEMENTS / PUBLICATIONS

- Achieved 5-Star rating on HackerRank in C++.
- Solved 600+ Data Structures and Algorithms problems across LeetCode, GeeksforGeeks, and TakeUForward, strengthening algorithmic problem-solving skills.
- LeetCode: Shubhi25 | GeeksforGeeks: shubhichalmf3
- NPTEL Certified: Deep Learning, Computer Vision, Social Networks.
- Published Research Paper: "Heart Attack Risk Prediction Using Retinal Fundus Images and CNN-Based DNN" — Presented at ICCSAI 2025 (International Conference on Communication, Security and AI).
